

## **Windows Viewing Properties**

1. To find more information about a file or a program, you can suggest that the student right click on the icon and select Properties.
2. You will see some of the following:
  - a. Object's type (file folder, program name, shortcut, etc.)
  - b. Location (the object's path)
  - c. Size
  - d. Created, Modified, and Accessed dates and times
